EDUCATION

University of Santo Tomas

Manila, Philippines

Bachelor of Science in Computer Science, Specializing in Data Science

2022 - 2026

- Cum Laude (GWA: 1.509)
- Dean's Lister (2022 - 2026)
- Department of Science and Technology (DOST) Scholar
- Top 9, CS Research Colloquium 2026, Data Science Track (2026)

EXPERIENCE

Freelance Web Developer & Graphic Designer

Remote

Independent Contractor

2025 - Present

- **Rosepine Hotel (UI/UX Design):** Redesigned a hotel booking platform's website and staff dashboard into high-fidelity prototypes, streamlining internal room reservation and housekeeping workflows and reducing staff navigation friction.
- **Mechabots Japan Truck Tradings (Web Development):** Co-developed a responsive inventory catalog with multi-attribute filtering and a custom admin dashboard, cutting manual update dependency and improving data accuracy for stakeholders.

Accenture

Taguig City, Philippines

SAP BTP Intern

January - May 2026

- Delivered defect-free system communication across simulated business integration scenarios by designing and deploying SAP BTP Integration Suite iFlows, validating message mapping and transformation logic.
- Reduced data and transformation errors by performing functional checks during deployment, identifying integration bottlenecks and tracking issues through to resolution.
- Built strong collaborative and technical foundations through structured, team-based guided learning activities, culminating in an Implementation Consultant certification.

KEY PROJECTS

Thesis: Detection and Classification of Panic Attack Occurrence and Severity Using Hybrid ANN-RF Model with Explainable AI

Machine Learning Developer

- Designed and tested the Random Forest component within a three-model comparison (RF, ANN, Hybrid ANN-RF), evaluating accuracy, precision, recall, F1-score, ROC AUC, and testing time.
- Contributed to validating the Hybrid model's trade-off profile — fastest testing time (0.06s) and highest precision (85.62%) — against ANN's leading accuracy (92.02%) and recall (98.72%).
- Improved result interpretability for non-technical end users by applying Explainable AI techniques to translate complex model outputs into verifiable insights.

Capstone: Subcontracting Management and Resource Tracking System for ACCE (SMARTS)

Business Analyst and Front-End Developer

- Analyzed existing system needs and stakeholder requirements, translating them into technical specifications used by the development team to guide implementation.
- Documented expected system behavior through process flow diagrams, creating a functional roadmap later used as the basis for test scenarios and test data preparation.
- Verified program correctness and usability by developing and testing front-end interfaces against documented business requirements prior to deployment.

ORGANIZATIONAL EXPERIENCE

UST Technovation Society

Visual Design Department

- Designed high-fidelity, accessible UI/UX interfaces for the official society website, ensuring consistent visual design and usability across pages.

UST Computer Science Society

Community Development Department

- Translated and localized content for the "Save Sierra Madre 2025" advocacy website, supporting environmental advocacy and community outreach efforts.
- Contributed to the "Vuja De Tech Talk 2023" project as part of the stage design team.

TECHNICAL SKILLS

Programming Languages: Python, Java, JavaScript, SQL
Web Technologies: HTML, CSS, Tailwind CSS, React
Databases: MySQL, PostgreSQL, Firebase, Supabase
Data Analytics: Data Analysis, Data Visualization (Tableau, Power BI), Data Lifecycle
Data Science: Statistical Analysis, Machine Learning, Predictive Modeling, Explainable AI
Design & UI/UX: Figma, Canva
Tools & Methodologies: Git, SDLC, Agile, Kanban
Generative AI: ChatGPT, Claude, Google Gemini
Productivity: Microsoft Office Suite, Google Workspace, Notion

CERTIFICATIONS

AWS Cloud Practitioner Essentials (Course Completion) - AWS Skill Builder	<i>May 2026</i>
SAP Certified Associate - Implementation Consultant (C_1EE2E) - SAP	<i>February 2026</i>
Data Analysis with Python - freeCodeCamp	<i>December 2025</i>
Information Technology Passport (ITPEC) Passer - PhilNITS	<i>November 2025</i>
Legacy Responsive Web Design V8 Certification - freeCodeCamp	<i>August 2023</i>
